Solar thermal Methods of fixing

Types of installation/ fixing systems	Collector type	
	Vertical	Horizontal
Above roof installation - With rafter hooks for standard roof tile cover 	Vitosol 200-FM, type SV2F (Vitosol 141-FM) Vitosol 300-TM, type SP3C	Vitosol 200-FM, type SH2F Vitosol 300-TM, type SP3C
- With rafter flange for plain tile and slate roof cover 		
Balcony and façade installation - Façade/balcony - Façade, on collector supports	Vitosol 300-TM, type SP3C	Vitosol 200-FM, type SH2F
Flat roof installation - On collector supports with variable installation angle - On collector supports with fixed installation angle	Vitosol 200-FM, type SV2F Vitosol 300-TM, type SP3C	Vitosol 200-FM, type SH2F
- Horizontal	Vitosol 300-TM, type SP3C	

VITOSOL 141-FM

Solar package for heating DHW
with solar energy, with dual mode DHW cylinder, incl. Solar-Divicon,
solar control unit, solar collectors and solar components

Solar KEYMARK certified

Vitosol 141-FM

Vitocell 100-B/-W, type CVBA

Floorstanding steel DHW cylinder with Ceraprotect enamel coating and two indirect coils, for heating by solar collectors and reheating by a boiler, incl. prefitted Solar-Divicon with electronics module, SDIO/SM1A or Vitosolic 100 type SD1.

Vitosol 100-FM, type SVKF/SVKG

Flat-plate collectors optimised for the application area with ThermProtect automatic temperature-dependent shutdown. For vertical above roof installation or roof integration (dark blue flashing frame).

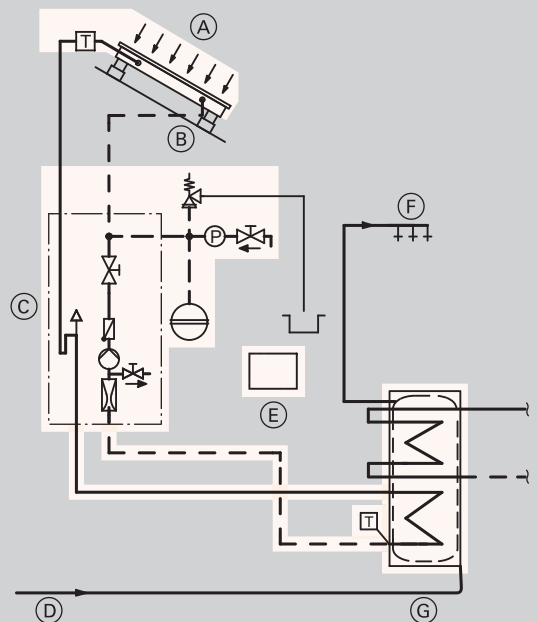

By combining solar thermal with a heat generator, **energy efficiency class A+** (as a system label) can generally be achieved for the overall heating system.

- Standard DHW solar package with components tailored to heating DHW with solar energy.
- Space optimised flat-plate collectors with ThermProtect automatic temperature-dependent shutdown for a vapour-free and fail-safe solar thermal system.
- Dual mode DHW cylinder fully equipped for quick and easy connection to the solar thermal system.
- Corrosion-resistant steel cylinder with Ceraprotect enamel coating. Additional cathodic protection via protective magnesium anode; impressed current anode available as an accessory.
- Straightforward and quick to install, as fill, vent and shut-off valves and a solar control unit are integrated in the Solar-Divicon which is already mounted on the cylinder.
- Low heat losses through highly effective, all-round thermal insulation.
- Immersion heater can be supplied upon request.
- Clearly defined application area: solar thermal system for solar DHW heating with two solar collectors.

9.1

VITOSOL 141-FM

- Vitosol 100-FM, type SVKF/SVKG
- Vitocell 100-B/-W, type CVBA fitted Solar-Divicon
- and **SDIO/SM1A electronics module SM1A** (in conjunction with Viessmann control units)

		Selectable components			MG WP

9.1

Notes:

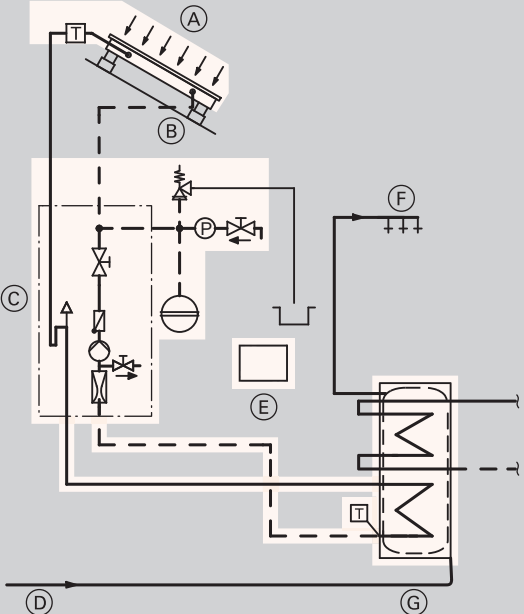

The collectors can be used for an installation height of up to 20 m. In systems taller than this, an 8 bar safety valve must be installed in the solar circuit (see "Accessories").

Standard delivery Vitosol 141-FM:

- Two Vitosol 100-FM, type SVKF/SVKG, flat-plate collectors with connection set including connection lines and collector temperature sensor
- Vitocell 100-B/-W, type CVBA dual mode DHW cylinder with prefitted Solar-Divicon, incl. variable speed high efficiency circulation pump for the solar circuit, electronics module SDIO/SM1A, air separator and fill valves
- Solar expansion vessel (18 litres)
Check this is sized appropriately by referring to the technical guide.
- Heat transfer medium (20 l)

VITOSOL 141-FM

- Vitosol 100-FM, type SVKF/SVKG
- Vitocell 100-B/-W, type CVBA fitted Solar-Divicon
- and Vitosolic 100, type SD1

VITOSOL 200-FM

Flat-plate collectors
for above roof and flat roof installation

Solar KEYMARK certified

Vitosol 200-FM

Flat-plate collectors Type SV2F and SH2F

For heating DHW, heating water and swimming pool water via a heat exchanger.

- For vertical or horizontal installation
- For installation on pitched roofs (above roof installation)
- For flat roof and freestanding installation (on collector supports)
- For installation on walls with type SH1F and SH2F

Pressure rating up to 6 bar (0.6 MPa).

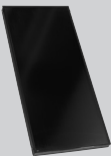

By combining solar thermal with a heat generator, **energy efficiency class A+** (as a system label) can generally be achieved for the overall heating system.

- Powerful flat-plate collectors for above roof and flat roof installation with ThermProtect automatic temperature-dependent shutdown for a vapour-free, fail-safe solar thermal system.
- Absorber designed with meander layout with integral headers. Up to 12 collectors can be linked in parallel.
- Vitosol 200-FM: attractive collector design; frame in dark blue. On request, the frame is also available in any other RAL colour.
- The absorber with selective coating, the stable, highly transparent cover made from special glass, and the highly effective thermal insulation ensure excellent solar yields.
- Permanently sealed and highly stable thanks to all-round folded aluminium frame.
- Puncture-proof and corrosion-resistant back panel.
- Easy to install Viessmann fixing system; standardised for all Viessmann collectors.
- Quick and reliable collector connection through flexible push-fit connectors made of corrugated stainless steel pipe.

VITOSOL 300-TM

Vacuum tube collector according to the heat pipe principle,
for utilising solar energy

Solar KEYMARK certified

Vitosol 300-TM

Vacuum tube collector
Type SP3C (1.98 m², 2.36 m² and 4.62 m² gross area)

For DHW, central heating and swimming pool water heating via a heat exchanger plus process heat.

For installation on flat or pitched roofs, on walls and for freestanding installation.

Pressure rating up to 6 bar (0.6 MPa).

By combining solar thermal with a heat generator, **energy efficiency class A+** (as a system label) can generally be achieved for the overall heating system.

- Highly efficient vacuum tube collector based on the heat pipe principle, with ThermProtect automatic temperature-dependent shutdown for a vapour-free and fail-safe solar thermal system (high operational reliability).
- Universal application through vertical or horizontal installation in any location, either on rooftops, façades or for freestanding installation.
- Special balcony module (1.98 m² gross area) for installation on balcony railings or façades.
- The absorber surface with highly selective coating integrated into the vacuum tubes is not susceptible to contamination.
- Efficient heat transfer through condensers fully surrounded by the Duotec double pipe heat exchanger.
- Tubes can be rotated for optimum alignment with the sun, thereby maximising the energy utilisation.
- Dry connection, meaning tubes can be inserted or changed while the system is full.
- Highly effective thermal insulation of the header casing for minimum heat losses.
- Easy installation through the Viessmann assembly and connection systems.

Accessories

Solar-Divicon (two-line pump station for the collector circuit)

- Fill valves
- Air separator
- 2 thermometers
- 2 ball valves with check valve
- Circulation pump
- Flow indicator
- Pressure gauge
- Safety valve (6 bar)
- Thermal insulation
- Locking ring fitting/double O-ring 22 mm

Solar-Divicon, type PS 10

With variable speed high efficiency circulation pump for alternating current.
Delivery head: 6.0 m at a pump rate of 1000 l/h.

Without control unit for solar thermal systems.

Control units for solar thermal systems

- Solar control module
- Vitosolic 100/200

Solar DHW heating and central heating backup

Solar control module, type SM1

Function extension inside enclosure for wall mounting.
Electronic temperature differential control for dual mode DHW heating and central heating backup using solar collectors.

- With output statement and diagnostic system
- Operation and display via the Vitotronic control unit
- Heating of two consumers via a collector array
- Second temperature differential control unit
- Thermostat function for reheating or utilising excess heat
- Speed control for solar circuit pump with PWM input (make: Grundfos and Wilo)
- Suppression of DHW cylinder reheating by the heat generator, subject to solar yield
- Suppression of reheating for heating by the heat generator with central heating backup
- Heat-up of the solar preheating stage (for DHW cylinders with capacity of 400 l or more)

Order the immersion temperature sensor, part no. 7438702, if the following functions are required:

- For DHW circulation changeover in systems with 2 DHW cylinders
- For return changeover between the heat generator and the heating water buffer cylinder
- For heating additional consumers

To extend the functionality of the boiler control units:

- Vitotronic 100, type GC7B, HC1A, HC1B, KC2B, KC4B, CC1I, CC1E
- Vitotronic 200, type GW7B, HO1A, HO1B, HO2B, HO2C, KO1B, KO2B, KW6A, KW6B, CO1I, CO1E, WO1C
- Vitotronic 300, type CM1I, CM1E, MW1B, MW2B

Standard delivery: Solar control module with

- Collector temperature sensor
- Cylinder temperature sensor

Vitosolic 100

Vitosolic 100, type SD1

Electronic temperature differential control for dual mode DHW heating with solar collectors, oil/gas boilers and solid fuel boilers.

- For wall mounting
- With collector temperature sensor and cylinder temperature sensor
- With digital temperature display, output statement and diagnostic system
- Solar circuit pump speed control via pulse pack control or solar circuit pump with PWM input (Grundfos, Wilo)
- In heating systems with KM-BUS:
Suppression of DHW cylinder reheating by the boiler.
Heat-up of the solar preheating stage (for DHW cylinders with 400 l capacity or more).
- In heating systems without KM-BUS:
Suppression of DHW cylinder reheating by the boiler.

<p>Distributor for solar central heating backup Connection assembly for straightforward installation between the boiler flue connection and Divicon heating circuit distributor. Can be mounted either on the boiler or the wall. Nominal diameter R1, can be used for nominal flow rates of up to 2.5 m³/h.</p> <ul style="list-style-type: none"> ■ Distributor ■ 3-way diverter valve ■ Thermal insulation ■ Sensor well for return temperature sensor 		7441163 594,-		Part no. Control units for solar thermal systems

Accessories

Accessories for the DHW cylinder of the solar thermal system and the Vitotronic of floorstanding boilers			
Accessories			MG W
<p>Threaded elbow For the installation of a cylinder temperature sensor for solar operation.</p> <ul style="list-style-type: none"> ■ Vitocell 100-V, type CVAA, CVAB-A 160 to 300 litre capacity ■ Vitocell 300-V, type EVIA-A, 160 to 300 litre capacity ■ Vitocell 300-V, type EVIA-A+, 160 and 200 litre capacity <p><i>Included in the standard delivery for Vitocell 100-B and 300-B.</i></p>	7175213 41,-	Part no. Euro	
<p>Threaded elbow For the installation of a cylinder temperature sensor for solar operation.</p> <ul style="list-style-type: none"> ■ Vitocell 100-V, type CVA, 500 l capacity ■ Vitocell 300-V, type EVIA-A, 500 litre capacity <p><i>Included in the standard delivery for Vitocell 100-B and 300-B.</i></p>	7175214 41,-	Part no. Euro	
<p>Threaded elbow For the installation of a cylinder temperature sensor for solar operation.</p> <ul style="list-style-type: none"> ■ Vitocell 100-V, type CVAA, 750 and 950 l capacity 	7219729 41,-	Part no. Euro	
<p>PCB For suppression of DHW cylinder reheating by the boiler and implementation of the auxiliary function for DHW heating in conjunction with the following Vitotronic control units.</p> <ul style="list-style-type: none"> ■ For Vitotronic 200, type KW1 with part no. 7450351 and 7450740 ■ For Vitotronic 200, type KW2 with part no. 7450352 and 7450750 ■ For Vitotronic 300, type KW3 with part no. 7450353 and 7450760 	7828192 151,-	Part no. Euro	
<p>PCB For suppression of DHW cylinder reheating by the boiler and implementation of the auxiliary function for DHW heating in conjunction with the following Vitotronic control units.</p> <ul style="list-style-type: none"> ■ For Vitotronic 200, type GW1 with part no. 7143006 ■ For Vitotronic 300, type GW2 with part no. 7143156 	7831930 173,-	Part no. Euro	
<p>PCB For suppression of DHW cylinder reheating by the boiler and implementation of the auxiliary function for DHW heating in conjunction with the following Vitotronic control units.</p> <ul style="list-style-type: none"> ■ For Vitotronic 333, type MW1 with part no. 7143421 	7828194 145,-	Part no. Euro
